Human-Led Intelligence Operations

This service is designed to identify and stop ransomware and data-theft attacks after a compromise has occured, but before damage is done.

Darkweb IQ Intercepts Here

Most controls detect attacks after damage begins.
This service operates earlier.

What's Included With Your Policy

- **Pre-Ransomware Alerts**
  Notification when credible evidence shows attackers preparing to use access tied to your organization or vendors.
- **Attack Interception**
  In many cases, attacks are disrupted before ransomware deployment or data theft.
- **Platform Access**
  Secure access to view alerts and activity issued on your behalf.

How This Fits Into Your Risk Program

- **Complements** existing security and response capabilities.
- **Provides** early warning of active compromises.
- **Does not replace** internal security controls or incident response services.

After your policy is issued, you will recieve an **onboarding email** with instructions to activate access and configure alerts.

Provided by **Darkweb IQ** as part of your **[insert carrier] Insurance policy**.

Incident Response before the Incident

Pre-Ransomware Interceptions

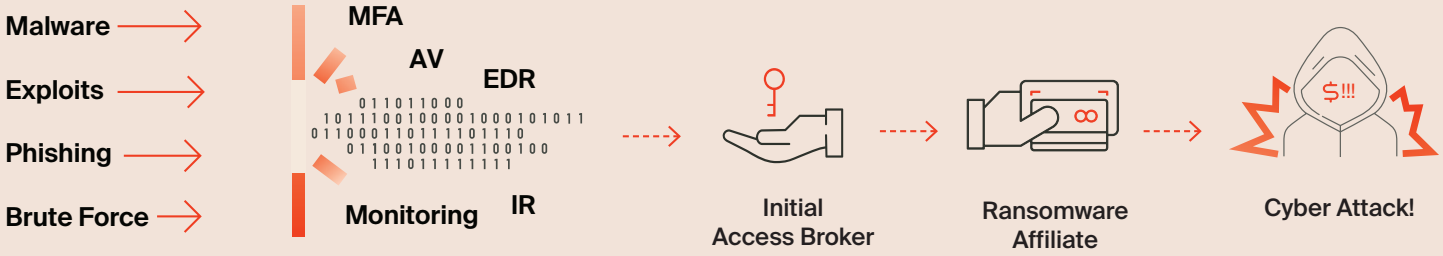
Go on the offense to confront the source of cybercrime

Vulnerabilities and misconfigurations will inevitably arise in every security program, leaving your business susceptible to opportunistic attacks. Traditional threat intel companies rely on surface-level monitoring of the dark web forums and extensive data breach databases to anticipate potential threats.

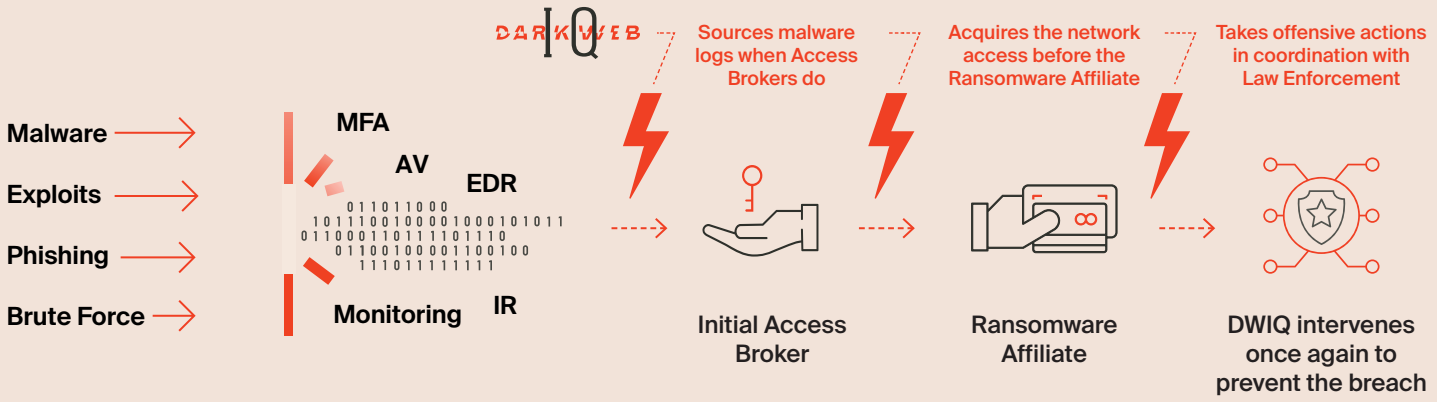
However, ransomware criminals often seek victims through other means. Darkweb IQ, in collaboration with law enforcement, employs a unique approach that involves deep infiltration of the cyber extortion ecosystem. This grants us unparalleled access to impending attacks, **allowing us to intercept them *before* they materialize**. By doing so, we protect your assets and prevent data breaches and ransomware attacks.

Continuously discover and remediate active compromises before data theft or encryption occurs

Anatomy of a Cyber Attack



Darkweb IQ Redefines Defense in Depth



Why Darkweb IQ?

Darkweb IQ goes beyond surface level collections of dark web chatter, forums, and data breach collections **to gain unparalleled visibility** into the ransomware criminals actually targeting you.

Insights gained from Darkweb IQ's daily attack interceptions improve prioritization of critical security program initiatives.

Actionable, specific, exclusive intelligence no other vendor can deliver.

Benefits

- Proactive, offensive protection
- A new layer of defense
- Improve resource allocation
- Remediate before damage occurs

"While we are working hard to secure our IT infrastructure, we sleep better knowing that Darkweb IQ is out there looking out for us."

-- Director of IT, Star Pipe Products

Darkweb IQ is an offensive cybercrime prevention firm protecting companies from ransomware, data theft, and third-party risks. In collaboration with law enforcement and the cyber insurance industry Darkweb IQ infiltrates cybercriminal supply chains to gain exclusive visibility into and intercept imminent ransomware attacks.

Our mission driven approach leads to the unmasking, prosecution, and extradition of some of the world's most dangerous threat actors.

An Early Warning Alert System

Supply Chain Security +

Go on the offense to confront the source of cybercrime

You entrust your vendors and third-parties with sensitive data, vital business secrets, and critical operational processes. Despite conducting point-in-time questionnaires, continuous external vulnerability scans, and expecting security accreditations and attestations, breaches and operational disruptions can still occur.

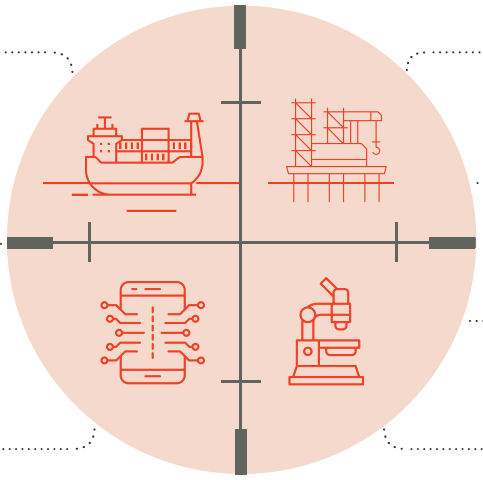
Whether large or small, these third-parties remain the weakest link in your cybersecurity chain. Darkweb IQ proactively identifies third-parties on the brink of an imminent attack, empowering you to swiftly implement risk mitigation measures. By enabling vendors to avert potential disasters, we safeguard your supply chain and protect your organization from costly breaches and disruptions.

Continuously discover and mitigate against imminent attacks on critical vendors or suppliers

Poorly defended, lower cyber maturity levels

Provide entry points to infect multiple customers

Caught in the middle of escalating geopolitical upheavals



21 days days average business interruption

66% suffer significant losses

25% suffer business closure

42% of insurance claims do not cover all costs

Protection from attacks on your critical third-parties

Share

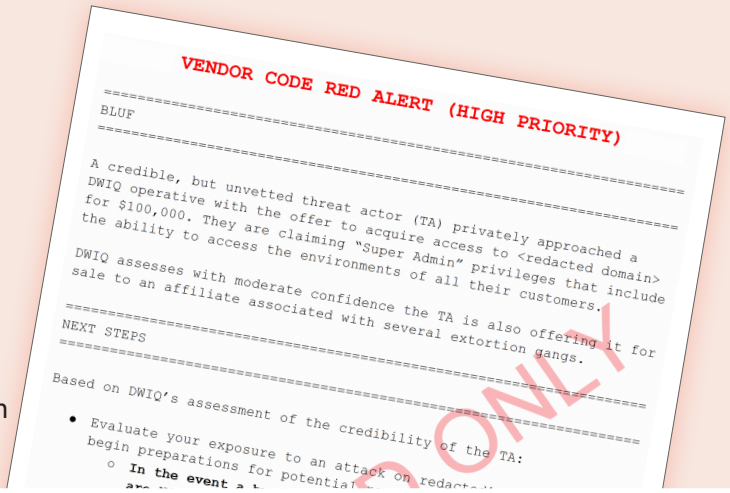
Upload domains of critical third-parties

Monitor

Darkweb IQ continuously and proactively detects any impending ransomware or data theft attacks against them

Alert

Darkweb IQ's early warning alert system enables time to mitigate potential impact of the third-party incident and enables the victim time to remediate before the data theft or disruption occurs



VENDOR CODE RED ALERT (HIGH PRIORITY)

BLUF

A credible, but unvetted threat actor (TA) privately approached a DWIQ operative with the offer to acquire access to <redacted domain> for $100,000. They are claiming "Super Admin" privileges that include the ability to access the environments of all their customers.

DWIQ assesses with moderate confidence the TA is also offering it for sale to an affiliate associated with several extortion gangs.

NEXT STEPS

Based on DWIQ's assessment of the credibility of the TA:

- Evaluate your exposure to an attack on redacted
  begin preparations for potential
  - In the event a

Why Darkweb IQ?

Go beyond perimeter scans and questionnaires from critical third-parties and gain early warning alerts related to impending attacks on them.

Insights gained from Darkweb IQ's daily attack interceptions improve prioritization of critical security program initiatives.

Actionable, specific, exclusive intelligence no other vendor can deliver.

Benefits

- Mitigate risks from third-party breaches
- Reduce friction with third-parties from unnecessary alerts
- Reduce reliance on questionnaires and scans
- Enable third-parties to remediate before damage occurs

> **"Your value was theoretical when we first signed up. But after yesterday's vendor alert, our management team fully understands your value."**

Infostealer IQ

Your First Line of Defense Against Infostealer Compromises

The Rising Threat

Infostealer malware is a rapidly escalating threat, with a 266 percent increase in activity in 2023. Breaches like those on WhatsApp, X, and LastPass, along with tactics used by Scattered Spider, highlight the severity. These attacks cause data theft, ransomware, and severe damage. Protect your organization now with 'Infostealer IQ' and stay ahead of these threats.

Why Choose Infostealer IQ

Exclusive Sources:
Access intelligence from high-risk suppliers not available to traditional security providers.

Noise Filtering:
Advanced algorithms and human analysis deliver only actionable intelligence.

Real-Time Alerts:
Notifications of newly compromised devices, credentials, and session tokens.

Key Features:

Comprehensive Monitoring
Continuous surveillance to catch threats early.

High-Fidelity Data
Access exclusive, high-quality data.

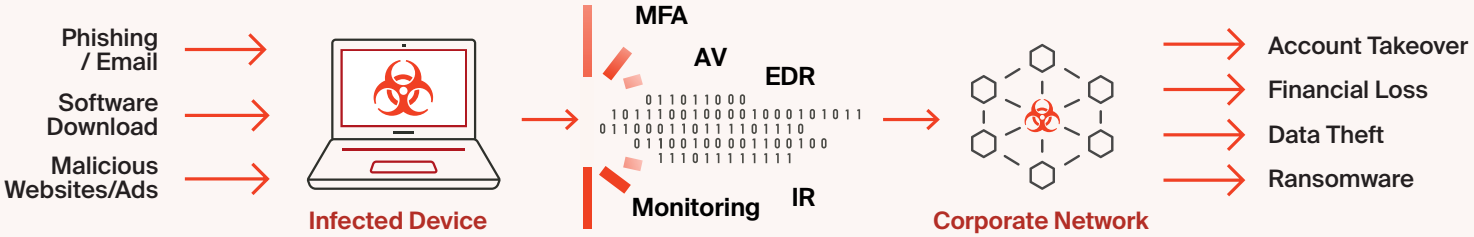
Actionable Intelligence
Clear notifications with immediate malware remediation steps.

Intelligence Services
Support from our Intel Services team for investigations.

"After subscribing to **Infostealer IQ** we were able to prevent multiple breach attempts that would have otherwise gone unnoticed. The exclusive data sources and the precision of alerts **made a significant difference in our threat response capabilities.**"

– CISO, Large Public University

Continously identify compromised devices connected to your network before the damage occurs



Why Darkweb IQ?

Exclusive High-Risk Suppliers:

"DWIQ is the **Ferrari of Intelligence**, delivering more than double the hits compared to any other vendor."

– V.P Cyber Threat Intel, Fortune 100 Bank

Noise Filtering:

"We investigated 6000 alerts from a leading vendor and not a single one was relevant. **Darkweb IQ had three, and all were actionable** and relevant."

– CISO, Fortune 500 BPO

Protect against these unseen threats before they strike!

Experience unparalleled protection with a no-obligation free trial.
